## EXPLANATORY NOTES

1. Except where otherwise specified, employment estimates contained in this Bulletin are obtained from three main sources, viz.,
  - (a) monthly data as to persons employed in factories as shown at Annual Factory Censuses;
  - (b) current monthly returns from Governmental Bodies; and
  - (c) current monthly Pay-roll Tax returns.

There are also some other direct records of monthly employment (e.g., for hospitals).

These are supplemented by estimates of the number of employees outside the ambit of the Factory Census, Governmental Bodies and Pay-roll Tax returns. Monthly numbers of factory employees subsequent to June, 1959 are estimated and are subject to revision when the Factory Censuses for 1959-60 and ensuing years are tabulated.

2. All figures in this Bulletin are compiled on an establishment or enterprise basis, and therefore do not cover exactly the same area of industry as do the relevant industry tabulations of the General Censuses of 1947 and 1954, which are based on the returns of individual employees.
3. The purpose of the estimates of employment in this Bulletin is to measure, as nearly as may be with available data, current monthly trends in employment in the defined field. Industry groups herein are not identical in coverage with Census groups.
4. The terms "Employment", "Number Employed", "Employees" and "Wage Earners" used herein are synonymous with, and relate to, "Wage and Salary Earners" on pay-rolls or "in employment" in the latter part of each month as distinct from numbers of employees actually working on a specific date. They include persons employed part-time.
5. Pay-roll Tax returns at present are lodged by all employers paying more than £200 a week in wages (other than certain Commonwealth Government Bodies, religious and benevolent institutions, public hospitals and other similar organizations specifically exempted under the Pay-roll Tax Assessment Act 1941-1957). This Act, when originally introduced in 1941, required employers paying wages of more than £20 a week to lodge returns. The exemption limit was raised to £80 a week from 1st October, 1953 and to £120 a week from 1st September, 1954. The present exemption limit of £200 a week was introduced as from 1st September, 1957.

# PREFACE

The figures relating to employment published in this Bulletin are estimates. From Bulletin No. 195, February, 1958, the series of estimated employment in "factories" shown in previous issues was replaced (commencing with the month of July, 1948) by a series showing actual monthly employment in factories as recorded at successive annual Censuses of Factories to June, 1957, with interim estimates for subsequent months. Adoption of this new series entailed adopting also new series for "Total Manufacturing", "Total Private Employment" and "Total Employment" for Males, Females and Persons, in all tables affected.

Since then the interim estimates have been replaced by actual numbers of factory employees as the results of successive annual Censuses of Factories to June, 1959 have become available. Substitution of Factory Census figures each year entails consequential revisions in the interim estimates for subsequent months.

## NOTES TO TABLES 7 AND 8

- (a) Includes the Northern Territory and the Australian Capital Territory.
- (b) The figures shown represent the actual monthly employment in factories as recorded at successive annual Censuses of Factories to June, 1959 with interim estimates for subsequent months. In this connexion, a factory is defined as an industrial establishment in which four or more persons are employed, or in which power, other than manual, is used. The employees covered are those engaged in manufacturing activities and exclude those engaged in selling and distribution, etc. The estimated numbers of employees in factories for the period July, 1948 to January, 1958 (shown in issues of this Bulletin up to No. 194) were based on Pay-roll Tax returns. This series was replaced as from July, 1948 in Bulletin No. 195 (February, 1958) and subsequent Bulletins by the Factory Census series referred to above.
- (c) Includes employees in industrial establishments outside the scope of the definition of a factory (given in (b) above) and persons employed by factory proprietors but engaged in selling and distribution, etc., who are excluded from figures shown opposite "Factories". Includes employees in factories in the Northern Territory and the Australian Capital Territory.
- (d) Includes Law and Order, Religion and Social Welfare, Health, Education, Other Professional Services, Amusement, Sport, etc., and Personal Service, (Hotels, Restaurants, etc., excluding female private domestics). In respect of females only, also includes Forestry, Fishing, etc., Mining, Building and Construction.
- (e) Includes persons employed on private building, and employees of private employers contracting to public bodies, on construction, alteration, maintenance and repair of buildings.
- (f) Includes employees engaged in the construction and maintenance of roads, bridges, earthworks, etc., and employees directly employed by public bodies on the construction and maintenance of buildings.
- (g) Includes Hotels, Restaurants, Hairdressing and Other Personal Services (except female private domestics).

## III. EMPLOYMENT IN LARGER PRIVATE FACTORIES

By joint arrangement between the Secretary of the Department of Labour and National Service and the Commonwealth Statistician, a regular monthly survey of employment in the larger privately-owned factories of New South Wales and Victoria was instituted in January, 1952. Practically all private factories with 100 or more employees and a large section of those with between 50 and 100 employees were surveyed. The survey was extended to cover all States with effect from January, 1953.

The instruction as to employees to be included in the returns was as follows:- "The number of persons employed is to include all persons on the establishment of the factory who are engaged in the factory or on the factory office staff, providing their employment is directly related to manufacture", and further "..... the number of males and females (separately) employed in the specified factory or mill. These figures are to include factory office staff, but are to exclude selling and distribution staff". The figures obtained relate to the numbers on the pay-roll as at the last pay-day in the month.

The survey was instituted to provide an earlier indication of trend of private factory employment, month by month, than is available from any other source, and in fact the trends shown in employment in these larger private factories are broadly consonant with those shown in estimates of total private factory employment, for the period for which comparisons are available.

Employment in food-processing factories is subject to considerable seasonal variation. In view of this circumstance, the movements in "all factories excluding food factories" are given equal prominence in the tables with those in "all factories surveyed".

An industrial analysis, showing movements in each of eight broad groups, is given in Table 13. In continuation of the earlier practice, this table is confined to the five mainland States. Figures for Tasmania cannot be incorporated into this table in the same detail because of the risk of disclosure of individual factory particulars.

(a) As the number of reporting factories in the collection varies from year to year the figures in Tables 9 to 13 are not comparable with those published in Bulletins prior to No. 229, December, 1960. The figures now published for 1960 have been adjusted to make them comparable with those obtained from the 1961 collection. \* Revised.

## V. AVERAGE EARNINGS AND RATES OF WAGE

TABLE 15 - AVERAGE WEEKLY TOTAL WAGES AND SALARIES PAID AND AVERAGE WEEKLY EARNINGS (a)

The following figures are derived from employment and wages recorded on Pay-roll Tax returns, from other direct collections and from estimates of the unrecorded balance. Pay of members of the Defence Forces is not included. The figures are not seasonally adjusted. A seasonally adjusted quarterly index of average wage earnings is shown in Table 16.

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, etc.

(b) Includes the Australian Capital Territory.

(c) Includes the Northern Territory.

(d) Total wages and salaries, etc., divided by total civilian employment expressed in male units. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. The same ratio has been used in each State and because the average ratio of female to male earnings may vary between States precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

**NOTE:-** Comparisons as to trend should be made for complete years or corresponding periods of incomplete years. Quarterly totals and averages are affected by seasonal influences.

(a) See footnote (a) to Table 15. (b) Average earnings per male unit employed. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. The "All Industries" index is based on Pay-roll Tax returns and other data. (c) The index for manufacturing industries for the years 1947-48 to 1959-60 is based on the average earnings of male wage and salary earners employed in factories as disclosed by annual Factory Censuses. The figures for periods subsequent to June, 1960 are interim estimates based on Pay-roll Tax returns and are subject to revision when the Factory Census for 1960-61 is tabulated.

NOTE:- The index numbers for "All Industries" and "Manufacturing" show the movement in average earnings over a period of time. However, they do not give, at any point of time, a comparison of actual earnings in the two groups.
